EDUCATION

Pennsylvania State University

Bachelor of Science in Computer Science

Graduated: December 2025

GPA: 3.6

EXPERIENCE

Innovative Owl Technology

Apr 2026 – Present

Software Developer

- Develop production features across **HR Healthcare web workflows** and **Carter Lumber mobile apps**, from requirements through implementation, testing, PR review, and release
- Resolve production-facing bugs across **Django/Vue** and **Flutter** products, documenting test steps, edge cases, and validation notes for reviewer sign-off

Client: HR Healthcare

Django | Vue | Python | JavaScript

Full-Stack Software Developer

- Shipped production features for **OrderPlatform**, a healthcare ordering platform supporting intake, clinic portals, patient services, approvals, renewals, document requests, and change-request workflows
- Delivered **100+ merged PRs** across Django APIs, Vue workflows, production bug fixes, and back-end/frontend tests during a high-volume release cycle

Client: Carter Lumber

Flutter | Dart | Firebase | Firestore

Mobile Software Developer

- Developed Flutter features for Carter Lumber apps, including employee news/settings, store and parcel locators, and vehicle document workflows
- Implemented **Firestore-backed Google Maps workflows** for stores and parcels with address, POS, and parcel search, custom pins, detail views, directions, email sharing, and contact actions
- Delivered **vehicle document workflows** with QR/search, PDF viewing, signature capture, scan-to-email, Smartsheet integration, Firebase storage, and local caching

PROJECTS

TopSignal | [GitHub](#)

React | TypeScript | FastAPI | PostgreSQL

- Built a **full-stack trading analytics workspace** with a **FastAPI** backend that syncs ProjectX/Topstep account and execution data into **PostgreSQL**
- Implemented dashboards, trade review, journaling, expense/payout tracking, and AI recap workflows that surface trading strengths, mistakes, risk patterns, and improvement areas
- Used TopSignal to analyze account performance, track payouts and expenses, and identify recurring risk patterns across accounts

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, TypeScript, Dart, SQL (PostgreSQL), HTML/CSS

Frameworks: Django, Vue, Flutter, React, FastAPI, Node.js, Express, Tailwind CSS

Databases: Firebase Firestore, MongoDB Atlas (Mongoose), PostgreSQL

DevOps & Tools: Git, Docker, Firebase, Firebase Cloud Messaging, Vite

Testing: Pytest, Vitest, Jest, React Testing Library
